Profile

Software engineer with a focus on front-end development. I have skills in creating intuitive applications using modern technologies and best programming practices. Motivated to continue learning and developing my professional skills in the field of software development.

Education

- SONORA TECHNOLOGICAL INSTITUTE 2024
- ENGLISH BI III

Experience

Internship at Down Obregon | Front-end Developer | January 2024 – May 2024

Design and development of an academic system in its initial stage, collaborating in the requirements analysis and business modeling. My main responsibility was the development of key use cases, using JavaScript for the front-end and Git as the version control tool.

JAMA Nutrition Center | Front-end Developer | August 2023 – December 2023

I collaborated in the development of a desktop application in Java with MySQL for a nutrition center. I contributed to the team by implementing design patterns to ensure a scalable architecture and maintainable code. My main responsibility was designing and developing the graphical user interface.
