---

## Profile

Software engineer with a special focus on front-end development and skills in creating intuitive applications using modern technologies and applying good programming practices. Committed to continuous learning and constant improvement.

## Education

- SONORA TECHNOLOGICAL INSTITUTE 2024
- ENGLISH BI III

## Experience

### Professional Internship at Down Obregon | Front-end Developer | January 2024 – May 2024

Developed an academic-administrative system, primarily focused on requirements analysis, diagram design, and development of a use case, using **JavaScript** for front-end development, **GitHub** for version control, and Lucidchart for diagram creation.

### Centro Nutricional JAMA | Front-end Developer | August 2023 – December 2023

Development of a **Java** application with **MySQL** to handle patient registration and the assignment of personalized diets based on registered dishes. The application uses **Singleton** and **Factory** design patterns to ensure a scalable architecture and facilitate code maintenance.
